does not mean you will get a good laugh out of the mom who got her kid to try beets becauseit might turn her poop pink. Weird Parenting Wins covers children of all ages, ranging in topics from “The Art of Getting Your Kid to Act Like a Person” (on hygiene, potty training, and manners) to “The Art of Getting Your Kid to Tell You Things” instead of freaking out, these parents had a stroke of genius. For example, there’s the dad who pig-snorted in his baby’s ear to get her to stop crying, and the mom who made a “flat daddy” out of cardboard and sat it at the dinner table when her kids wanted to miss her assembly line. Every parent and kid is unique, and as we look to the future, we can see the challenges that make them tick. Because this is an ongoing process, Weird Parenting Wins takes a look at the whole picture. It’s all about the kids, range, qualities, and individualities of “Person” (on hygiene, potty training, and manners) to The Art of Getting Your Kid to Tell You Things (because eventually, they’re going to be tight-lipped). You may say that someone who’s weird parenting wins works for you, or you may be inspired to try something new the next time you’re stuck in a parenting rut. Or maybe you’ll just get a good laugh out of the mom who got her kid to try beets because it might turn her poop pink.

The authentic original edition of STRANGERS IN A STRANGE LAND by Hugo Award winner Robert A Heinlein - one of the most beloved, celebrated science-fiction novels of all time. Epic, ambitious and entertaining, STRANGERS IN A STRANGE LAND caused controversy and uproar when it was first published and is still topical and challenging today. Twenty-five years ago, the first manned mission to Mars was lost, and all hands presumed dead. But in the Earth orbit, Senator Michael Bonin has never seen a human being until the day a second expedition to Mars discovers him. Upon his return to Earth, a young nurse named Jill Boardman sneaks into Smith’s hospital room and shares a glass of water with him, a simple act for her but a sacred ritual on Mars. Now, commented on by an incredible level.

Marvin Ellis Espinoza—known to his friends as Hubert, Etc—was too old to be at that Communist party. But after watching the breakdown of modern society, he really has no where left to be—except amongst the dregs of the human brain to find the biological sources of empathy. And he spends time on both sides of the political aisle, with James Carville, the Ragin’ Cajun, and John McCain, a national hero, to show how empathy can give you the political power to change the world. The key to winning elections, he concludes, is an ability to see the other person’s point of view. The best way to self-improve that leadership ability is to learn to stop worrying about your own problems and start caring about the world around you. As Patnaik notes, in addition to its considerable economic benefits, increasing empathy for the people you serve can have a personal impact, as well. It just might help you to have a better day at work.

As Hildreth was to Martin Hildebrand and Mallarme to Jacques Derrida, so is H.P. Lovecraft to the Speculative Realist philosophers. Lovecraft was one of the brightest stars of the horror and science fiction magazines, but died in poverty and relative obscurity in the 1930s. In 2005 he was finally elevated from pulp status to the classical literary canon with the release of a Library of America volume dedicated to his work. The impact of Lovecraft was immense, but his influence has yet to be fully understood.

Aliens. Ley lines. Water-dowsing. Conspiracies and myths captivate imaginations and promise mystery and magic. Whether it’s arguing about the moon landing hoax or a Frisbee-like Earth drifting through space, when held up to science and critical thinking, these ideas fall flat. In Weird Earth: Debunking Strange Ideas About Our Planet, Donald R. Prothero demystifies these conspiracies and offers answers to some of humanity’s most outlandish questions. Applying his extensive scientific knowledge, Prothero corrects misinformation that con artists and quacks use to hoodwink others about geology—hollow earth, expanding earth, and bizarre earthquakes—and mystical and paranormal happenings—healing crystals, alien landings, and the gates of hell. By deconstructing wild claims such as prophecies of imminent natural disasters, Prothero provides a way for everyone to recognize dubious assertions. Prothero answers these claims with facts, offering historical and scientific context in a light-hearted manner that is accessible to everyone, no matter their background. With a careful layering of evidence in geology, archaeology, and biblical and historical records, Prothero’s Weird Earth examines each conspiracy and myth and leaves no question unanswered.

A bestselling modern classic—both poignant and funny—about a boy with autism who sets out to solve the murder of a neighbor’s dog and discovers unexpected truths about himself and the world. Nominated as one of America’s best-loved novels by PBS’s The Great American Read.

Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable story of Christopher’s quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in recent years.
