The Oxford Dictionary of Abbreviations

"Clarke's Dictionary of Transactional Analysis" is a compendium of definitions, diagrams, organizations, biographies, and awards is a comprehensive and inclusive encyclopedia of all matters TA. This one-of-a-kind reference work has entries from the earliest days (when Dr. Berne held seminars in his home) through the latest edition of the "Transactional Analysis Journal". Here you can find precis of the ideas, thoughts, and writings of both the originators of this cutting-edge discipline, and the most recent practitioners. TA is unique in that it covers such a wide ground – psychology, education, and organization, plus it is a world-wide avocation. Herein lie both its strengths and its weaknesses. Its strengths are that TA is wide-spread and has different disciplines. The weakness is that this broad and often unconnected thread of practice and scholarship makes it challenging for both the beginner and the true and tried professional to keep a handle on what is going on. This reference work helps bridge the gap; it brings together ideas, discoveries, and exploration from all the TA disciplines and from all over the world. It includes references to TA and disabilities, TA and women, TA and homosexuality, TA and women, TA and globalizations, in fact, all the day-to-day issues that everyone deals with on Planet Earth. Susan Legender Clarke is an educational member of the ITAA. She studied with Jean Ilsey Clarke from 1993 to 1998 with students from Finland and Peru as well as all over the USA. Dr. Clarke wanted to have a central source of information about TA for the set homework, and so the Dictionary was conceived. Currently, Dr. Clarke earns her living as a Doctor of Chiropractic, specializing in the treatment of long-term chronic health issues including PTSD, Migraines, Allergies, plus the more usual pain issues.
