Seeing Anthropology This concise introductory textbook emphasizes the major concepts of both anthropology and the anthropology of religion. It is aimed at students encountering anthropology for the first time. Reviewers describe the text as vivid, rich, user-friendly, accessible, and well-organized. The Anthropology of Religion, Magic, and Witchcraft examines religious expression from a cross-cultural perspective while incorporating key theoretical concepts. In addition to providing a basic overview of anthropology, including definition of key terms and exposure to ethnographies, the text exposes students to the varying complexity of world religions.

Discover Sociology Gillian Rose introduces the general themes and recent debates on the meaning of culture and the function of the visual in this introduction to interpreting the visual.

Seeing My Skin This book is the outstanding and most frequently cited work in the field of Anthropology. It made the author world-famous and established her as the leader in her field for the next 50 years. One of the reasons this book became so famous was her observation that young Samoan women deferred marriage for many years while enjoying casual sex before eventually choosing a husband. This led to the Sexual Revolution that swept America in the 1960s and brought about the establishment of the Sexual Freedom League and other organizations. The Free Love generation idolized Margaret Mead.

Doing Visual Ethnography The Handbook of Methods in Cultural Anthropology, now in its second edition, maintains a strong benchmark for understanding the scope of contemporary anthropological field methods. Avoiding divisive debates over science and humanism, the contributors draw upon both traditions to explore fieldwork in practice. The second edition also reflects major developments of the past decade, including: the rising prominence of mixed methods, the emergence of new technologies, and evolving views on ethnographic writing. Spanning the chain of research, from designing a project through methods of data collection and interpretive analysis, the Handbook features new chapters on ethnography of online communities, social survey research, and network and geospatial analysis. Considered discussion of ethics, epistemology, and the presentation of research results to diverse audiences round out the volume. The result is an essential guide for all scholars, professionals, and advanced students who employ fieldwork.

Experiencing Cities From an award-winning anthropologist, a lively, accessible, and irreverent introduction to the field. What is anthropology? What can it tell us about the world? Why, in short, does it matter? For well...
over a century, cultural anthropologists have circled the globe, from Papua New Guinea to California, uncovering surprising insights about how humans organize their lives and articulate their values. In the process, anthropology has done more than any other discipline to reveal what culture means and why it matters. By weaving together examples and theories from around the world, Matthew Engelke provides a lively, accessible, and at times irreverent introduction to anthropology, covering a wide range of classic and contemporary approaches, subjects, and anthropologists. Presenting memorable cases, he encourages readers to think deeply about key concepts that anthropologists use to make sense of the world. Along the way, he shows how anthropology helps us understand other cultures and points of view—but also how, in doing so, it reveals something about ourselves and our own cultures, too.

Handbook of Methods in Cultural Anthropology Video includes short clips from 15 ethnographic films, tied to chapters in the book.

Conformity and Conflict This comprehensive anthology offers over 40 readings that are critical to the understanding of anthropological theory and the development of anthropology as an academic discipline. The fourth edition maintains a strong focus on the "four-field" roots of the discipline in North America but has been reorganized with a new section on twenty-first-century theory, including coverage of postcolonial and public anthropology. New key terms and introductions accompany each reading and a revamped glossary makes the book more student-friendly. Used on its own, or together with the overview text A History of Anthropological Theory, Fourth Edition, this anthology offers a flexible and unrivaled introduction to anthropological theory that reflects not only the history but also the changing nature of the discipline today. For additional resources, visit the "Teaching Theory" page at www.utpteachingculture.com.

Research Methods in Anthropology Praised for its conversational tone, personal examples, and helpful pedagogical tools, the Fourth Edition of Explorations in Classical Sociological Theory: Seeing the Social World is organized around the modern ideas of progress, knowledge, and democracy. With this historical thread woven throughout the chapters, the book examines the works and intellectual contributions of major classical theorists, including Marx, Spencer, Durkheim, Weber, Mead, Simmel, Martineau, Gilman, Douglass, Du Bois, Parsons, and the Frankfurt School. Kenneth Allan and new co-author Sarah Daynes focus on the specific views of each theorist, rather than schools of thought, and highlight modernity and postmodernity to help contemporary readers understand how classical sociological theory applies to their lives.
First Along the River The fourth edition of this popular book by Jessica Utts develops statistical literacy and critical thinking through real-world applications, with an emphasis on ideas, not calculations. This text focuses on the key concepts that educated citizens need to know about statistics. These ideas are introduced in interesting applied and real contexts, without using an abundance of technicalities and calculations that only serve to confuse students. NEW for Fall 2020 - Turn your students into statistical thinkers with the Statistical Analysis and Learning Tool (SALT). SALT is an easy-to-use data analysis tool created with the intro-level student in mind. It contains dynamic graphics and allows students to manipulate data sets in order to visualize statistics and gain a deeper conceptual understanding about the meaning behind data. SALT is built by Cengage, comes integrated in Cengage WebAssign Statistics courses and available to use standalone. The Essence of Anthropology Culture, Health and Illness is an introduction to the role of cultural and social factors in health and disease, showing how an understanding of these factors can improve medical care and health education. The book demonstrates how different cultural, social or ethnic groups explain the causes of ill health, the types of treatment they believe in, and to whom they would turn if they were ill. It discusses the relationship of these beliefs and practices to the instance of certain diseases, both physical and psychological. This new edition has been extended and modernised with new material added to every chapter. In addition, there is a new chapter on 'new research methods in medical anthropology', and the book in now illustrated where appropriate. Anyone intending to follow a career in medicine, allied health, nursing or counselling will benefit from reading this book at an early stage in their career.

Visual Methodologies This extraordinary text for undergraduate urban students is a reflection of Mark Hutter’s academic interests in urban sociology and his life-long passion for experiencing city life. His deep academic roots in the Chicago School of Sociology help inform and appreciate the variety of urban structures and processes and their effect on the everyday lives of people living in cities. This text, however, extends the Chicago School perspective by combining its traditions with a social psychological perspective derived from symbolic interaction and also with a macro-level examination of social organization, social change, stratification and power in the urban context, informed by political economy. This entirely new, 3rd Edition has a global outlook on city life, and a visual presentation unmatched among books in this genre.
The Art of Dreaming This text explores the use and potential of photography, video and electronic media in ethnographic and social research. The book has a reflexive approach to the theoretical, methodological, practical and ethical issues involved when using media.

Seeing Anthropology One of the most popular anthropological case studies published in the last two decades, the latest edition of The Gebusi incorporates important new fieldwork, bringing ethnographic excellence and a riveting story fully up to date. Readers are welcomed into the lives of Papua New Guinea rainforest dwellers to witness a dramatic arc of cultural change and human transformation. When Knauft first studied them, Gebusi practiced powerful spirit séances and sorcery divinations, held resplendent initiations that included distinctive sexual customs, and endured high rates of violence. Sixteen years later, he found them participating in market activity, schooling, government programs, and sports; performing their own popular music; and practicing Christianity. More recently, Gebusi have been battered by economic hardship and withdrawal of government services—but have admirably revitalized their culture and livelihood. Sustained by traditions, access to land and waterways, and a keen sense of humor and vitality, Gebusi exhibit resilience and dignity amid conditions of continuing uncertainty and change. An absorbing, well-written, and humanistic account based on profound scholarship, The Gebusi, 4/E includes end-of-chapter “Broader Connections” that link Gebusi experiences to major anthropological topics—subsistence, kinship and marriage, politics, religion, gender and sexuality, ethnicity, nationalism, modernity, and the ethics of engaged and applied anthropology. A stunning full-color photo insert accentuates Knauft’s absorbing narrative. Callouts to instructional videos recorded with Gebusi and to an extensive online image bank on the author’s website further enrich the ethnography.

Explorations in Classical Sociological Theory

Seeing Ourselves : Classic, Contemporary, and Cross-cultural Readings in Sociology Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body
and mind. Susan Sontag called anthropology a "heroic" profession. What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Culture, Health and Illness 4Ed The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. What key social forces construct and transform our lives as individuals and as members of society? How does our social world shape us? How do we shape our world? Discover Sociology presents sociology as a discipline of curious minds. The authors inspire curiosity about the social world and empower students by providing the theoretical, conceptual, and empirical tools they need to understand, analyze, and even change the world in which they live. Organized around four main themes—The Sociological Imagination, Power and Inequality, Technological Transformations of Society, and Globalization—the book illuminates the social roots of diverse phenomena and institutions, ranging from poverty and deviance to capitalism and the nuclear family. "Behind the Numbers" features illustrate the practical side of sociology and shows students how to be critical consumers of social science data reported in the media. And every chapter addresses the question, "What can I do with a sociology degree?" by linking the knowledge and skills acquired through studying sociology with specific jobs and career paths. The Gebusi First Along the River introduces students to the U.S. environmental movement. Concise, accessible, and informative, this book provides students with a balanced, historical perspective on the history of the environmental movement in relation to major social and political events in U.S. history. The book highlights important people and events, places critical concepts in context, and shows the impact of government, industry, and population on the American landscape. The fourth edition includes a new chapter that covers the entire environmental record of the George W. Bush administration, and the early record of the Obama administration.

Seeing Through Statistics Harry Wolcott discusses the fundamental nature of ethnographic studies, offering important suggestions on improving and deepening research practices for both novice and expert researchers.

Cultural Anthropology: 101 An Introduction to Social Anthropology opens up the field of social and cultural anthropology, demonstrating its value for building an understanding of the vast diversity of human societies and cultures that make up the world today. Without assuming any prior knowledge, the book gradually leads the reader from some of the discipline's earliest foundational approaches and theories, through the fundamental areas that make up contemporary anthropology. Taking a truly global and holistic view, it includes case studies from far away as well as closer to home, wherever you might be reading it, touching on a range of topics that both divide and connect us, such as family, marriage and religion. This third edition closes with a new chapter discussing the role of social and cultural anthropologists and the specific methods they use in a fast-changing world. This is an inviting, engaging and enjoyable text that aims to smooth the journey for new or prospective anthropology students seeking to better understand the discipline and its roots. Offering illustrations, plentiful further readings and films, first-hand accounts of
people across the world, and a number of thorny topics for reflection, the book makes an ideal text for sharing and discussing in the classroom too.

The Dobe Ju/'Hoansi Demonstrate the nature of culture and its influence on people's lives. Seeing Anthropology THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements support these main themes and give deeper insight into the meaning and relevance of a wide
range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. Coming of Age in Samoa Lassiter's accessible introduction to anthropology encourages students to evaluate its relevance in our increasingly complex world. Part I focuses on the underlying assumptions and concepts that have driven anthropological theory and practice since its modern inception. Part II explores cross-cultural human issues showing how anthropological studies offer relevant insight into human beings and valuable models for thinking and acting. Invitation to Anthropology is an ideal text for undergraduate students, easily supplemented with case studies in anthropology.

Invitation to Anthropology A newer edition of this book is available for ordering at the following web address: https://rowman.com/ISBN/9780759112421 Research Methods in Anthropology is the standard textbook for methods classes in anthropology programs. Over the past dozen years, it has launched tens of thousands of students into the field with its combination of rigorous methodology, wry humor, commonsense advice, and numerous examples from actual field projects. Now the fourth edition of this classic textbook is ready, written in Russ Bernard's unmistakable conversational style. It contains all the useful methodological advice of previous editions and more: additional material on text analysis, an expanded section on sampling in field settings, the use of computers for fieldwork and analysis, the pros and cons of rapid assessment techniques in anthropology, dozens of new examples, and an expanded bibliography. 'Methods belong to all of us' is the watchphrase of this book. Whether you are coming from a scientific, interpretive, or applied anthropological tradition, your students should learn field methods from the best guide around.

Seeing for Yourself This volume uses the concept of culture to explore the parameters of aging and being old in a worldwide context, thus providing a true cross-cultural and qualitative approach to social gerontology. Containing both specific case studies and broader analytical articles, this revised second edition focuses on the multitude of cultural solutions societies have available for dealing with the challenges,
problems, and opportunities of growing old. Each of the book's six parts is preceded by an introduction providing a framework for the chapters and highlighting key related issues. Also included are state-of-the-art resource guides, including Internet sites, special student resources, data sets, and annotated bibliographies of related readings. This essential text focuses on how real people worldwide experience old age, allowing students to understand fully how culture can dictate what may appear to be "natural" responses to elders and aging.

The Cultural Context of Aging This handbook provides information to help the policymaker or educator understand the research process in order to study problems and opportunities associated with the education of girls in Africa. In Africa, girls account for only 57% of the school-age population. They are more likely to drop out of school and to score lower on the examinations that determine their enrollment at postprimary levels. Research into the education of girls has the potential to improve their opportunities, and to raise the educational level of society in African countries. The purpose of research is outlined, and steps in planning a research project are defined. The discussion of the planning phase includes a discussion of sampling and sample size selection. Part III of this manual reviews the basic tools of the social science researcher. Literature reviews, techniques such as surveys and interviews, and qualitative research are described. A final section considers working with research findings and using the results. Appendixes present a sample research outline, an example data grid, and a list of some research instruments commonly used in the study of education of girls. Suggested readings are listed with each chapter. (Contains 36 figures, 50 tables, 33 illustrative boxes, and 104 references.) (SLD)

Our Origins Seeing Anthropology continues to be the only cultural anthropology text available that allows for easy integration of ethnographic films into the introductory cultural anthropology course. This text truly incorporates films within the text by blending textbook content with fourteen ethnographic film clips that are put in the hands of students. More flexible ordering options are available with the new edition (See New to this Edition section below). One reviewer says, The greatest strengths of this text are its unique and skillful use of film clips to enhance student learningI can think of no better way to extend student learning in anthropology than the use of films, and there is no one more qualified to select and present anthropological films than the author of this book.

Readings for a History of Anthropological Theory, Fourth Edition Seeing Wittgenstein Anew is a collection which examines Ludwig Wittgenstein's remarks on the concept of aspect-seeing, showing that it was not simply
one more topic of investigation in Wittgenstein's later writings but rather a pervasive and guiding concept in his efforts to turn philosophy's attention to the actual conditions of our common life in language. The essays in this 2010 volume open up novel paths across familiar fields of thought: the objectivity of interpretation, the fixity of the past, the acquisition of language, and the nature of human consciousness. Significantly, they exemplify how continuing consideration of the interrelated phenomena of aspect-seeing might produce a fruitful way of doing philosophy in a new century.

An Introduction to Social Anthropology Female anthropologists scan patterns and changes in women's roles in various social systems

How to Think Like an Anthropologist Video includes short clips from 15 ethnographic films, tied to chapters in the book.

Dreams That Matter The Third Edition of this best-selling text now includes an update to the evolutionary primate taxonomy and even more tools to help students grasp the major concepts in physical anthropology—including new, photorealistic art.

Ethnography • A personal journey of a priest’s understanding of his Whiteness widens into an invitation to wrestle with larger cultural issues of race and belonging With humor, and a sharp, easily-readable style, Peter Jarrett-Schell delves deeply into how Whiteness has shaped his life. By telling his story, he challenges readers to personally consider the role of race in their own lives. In recent years, white institutions, congregations, and individuals have all begun to wrestle with their racial legacy. But these reflections often get lost abstracting ideas of “white privilege,” “white fragility,” “structural racism,” and the like, until they become nothing more than jargon. This book challenges its readers to look closely at how these concepts show up in their everyday lives. By examining how Whiteness has distorted his own perceptions, relationships, and sense of self, Jarrett-Schell argues for the personal stakes that white people have in dismantling racism, and offers the creative possibilities that emerge when we begin to do the work.

Doing Visual Ethnography This classic, bestselling study of the !Kung San, foragers of the Dobe area of the Kalahari Desert describes a people's reactions to the forces of modernization, detailing relatively recent changes to !Kung rituals, beliefs, social structure, marriage and kinship system. It documents their determination to take hold of their own destiny, despite exploitation of their habitat and relentless development to assert their political rights and revitalize their communities. Use of the name Ju/'hoansi (meaning real people) acknowledges their new sense of
empowerment. Since the publication of the Third Edition in 2003, Richard Lee has made eight further trips to the Kalahari, the most recent in 2010 and 2011. The Dobe and Nyae Nyae Areas have continued to transform and the people have had to respond and adapt to the pressures of capitalist economics and bureaucratic governance of the Namibian and Botswana states. This Fourth Edition chronicles and bears witness to these evolving social conditions and their impacts on lives of the Ju/'hoansi.
