Is this the America you want? If not, here's how to claim the power to change your country. We are in an age of epic political turbulence in America. Old hierarchies and institutions are collapsing. From the election of Donald Trump to the upending of the major political parties to the spread of grassroots movements like Black Lives Matter and \$15 Now, people across the country and across the political spectrum are reclaiming power. Are you ready for this age of bottom-up citizen power? Do you understand what power truly is, how it flows, who has it, and how you can claim and exercise it? Eric Liu, who has spent a career practicing and teaching civic power, lays out the answers in this incisive, inspiring, and provocative book. Using examples from the left and the right, past and present, he reveals the core laws of power. He shows that all of us can generate power—and then, step by step, he shows us how. The strategies of reform and revolution he lays out will help every reader make sense of our world today. If you want to be more than a spectator in this new era, you need to read this book.

The Engaged University is a comprehensive empirical account of the global civic engagement movement in higher education. In universities around the world, something extraordinary is underway. Mobilizing their human and intellectual resources, institutions of higher education are directly tackling community problems - combating poverty, improving public health, and restoring environmental quality. This book documents and analyzes this exciting trend through studies of civic engagement and social responsibility at twenty institutions worldwide. This timely volume offers three special contributions to the literature on higher education policy and practice: a historical overview of the founding purposes of universities, which almost invariably included a context-specific element of social purpose, together with a survey of how these "founding" intentions have fared in different systems of higher education; a contemporary account of the policy and practice of universities - all over the world - seeking to re-engage with this social purpose; and an overview of generic issues which emerge for the "engaged university."

Recharging Judaism is the essential and timely guide for every synagogue and community seeking to strengthen the bonds of Jewish communal life through advocating for social justice. This volume delves into the enriching civic engagement and acts of righteousness already undertaken by Jews and Jewish communities across the country, and further explores the positive differences we can all affect upon the future of America. There are a myriad of ways in which advocating for social justice and participating in civic engagement can create lasting change. Those inspired to affect such change will find new meaning in the texts and history of our tradition. Using real examples from both small and large congregations across the country, Recharging Judaism offers a framework to guide us through our journey of civic responsibility and social duty and into a brighter future for our country.

Contemporary American society, with its emphasis on mobility and economic progress, all too often loses sight of the importance of a sense of "place" and community. Appreciating place is essential for building the strong local communities that cultivate civic engagement, public leadership, and many of the other goods that contribute to a flourishing human life. Do we, in losing our places, lose the crucial basis for healthy and resilient individual identity, and for the cultivation of public virtues? For one can't be a citizen without being a citizen of some place in particular; one isn't a citizen of a motel. And if these dangers are real and present ones, are there ways that intelligent public policy can begin to address them constructively, by means of reasonable and democratic innovations that are likely to attract wide public support? Why Place Matters takes these concerns seriously, and its contributors seek to discover how, given the American people as they are, and American economic and social life as it now exists—and not as those things can be imagined to be in some utopian scheme—we can find means of fostering a richer and more sustaining way of life. The book is an anthology of essays exploring the contemporary problems of place and placelessness in American society. The book includes contributions from distinguished scholars and writers such as poet Dana Gioia (former chairman of the National Endowment for the Arts), geographer Yi-Fu Tuan, urbanist Witold Rybczynski, architect Philip Bess, essayists Christine Rosen and Ari Schulman, philosopher Roger Scruton, transportation planner Gary Toth, and historians Russell Jacoby and Joseph Amato.

This ebook is a selective guide designed to help scholars and students of Islamic studies find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated. This ebook is a static version of an article from Oxford Bibliographies Online: Renaissance and Reformation, a dynamic, continuously updated, online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study of European history and culture between the 14th and 17th centuries. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit [www.oxfordbibliographies.com](http://www.oxfordbibliographies.com).

- Suspension modifications for street, strip, or track--springs, shocks, bushings, anti-roll bars, strut tower bars, wheels and tires- Bolt-on performance--air induction systems, cam timing and overdrive pulleys, headers, exhaust systems, ignition, and ECU technology- Hard core engine modification--complete engine swap information that tells you which are the best and easiest swaps and which are the ones to avoid, pistons, head work, cams, engine building tricks, supercharging vs. turbocharging, and nitrous- Getting the power to the pavement--clutches and flywheels, differential, and shifters- Braking--pads, rotors, and discs all around- Exterior interior styling - exterior styling components (including rear deck wings) and a chapter on exterior graphics- Interior design--seats, door panels, gauges, and cages- Performance driving--road racing and autocross, drag racing, and driving schools- Finding and starting a Honda club- The history of the Civic with photos of the various models

The term "Civic Tech" has gained international recognition as a way to unite communities and government through technology design. But what does it mean for our shared future? In this book, Andrew Schrock cuts through the hype by telling stories of the people and ideas driving the movement. He argues that Civic Tech emerged as a cultural movement to address inequality and a wide range of social problems. The collaborative approaches and early successes of "techies" exemplify a powerful civic alternative. Ultimately, Civic Tech draws our attention to the challenges of democratic technology design and public ownership—vital goals for the years ahead.

Traces the root of modern, sprawling megacities to advances in information technologies throughout the twentieth century and discusses how these advances can inform and improve the future of human settlements.

Community college faculty can turn to this easy-to-use guide for both the theory and the practice of incorporating civic responsibility concepts into service learning courses. Includes multiple faculty and student exercises, activities, and assessment tools.

Presents tips and advice for professionals who are creating or overseeing service-learning programs.

Based upon a three-year multi-disciplinary international research project, *Political and Civic Participation* examines the interplay of factors affecting civic and political engagement and participation across different generations, nations and ethnic groups, and the shifting variety of forms that participation can take. The book draws upon an extensive body of data to answer the following key questions: Why do many citizens fail to vote in elections? Why are young people turning increasingly to street demonstrations, charitable activities, consumer activism and social media to express their political and civic views? What are the barriers which hinder political participation by women, ethnic minorities and migrants? How can greater levels of engagement with public issues be encouraged among all citizens? Together, the chapters in this volume provide a comprehensive overview of current understandings of the factors and processes which influence citizens' patterns of political and civic engagement. They also present a set of evidence-based recommendations for policy, practice and intervention that can be used by political and civil society actors to enhance levels of engagement, particularly among youth, women, ethnic minorities and migrants. *Political and Civic Participation* provides an invaluable resource for all those who are concerned with citizens' levels of engagement, including: researchers and academics across the social sciences; politicians and political institutions; media professionals; educational professionals and schools; youth workers and education NGOs; and leaders of ethnic minority and migrant organizations and communities.

Increasingly, foundations are finding that participation in public decision making is often a critical component in reaching the impact demanded by mission-related goals. For those weighing precisely what role foundations should play, the mix of real-life examples, practical advice, and inspiration in this book are invaluable.

How do scientists, scholars, and other experts engage with the general public and with the communities affected by their work or residing in their sites of study? Where are the fine lines between public scholarship, civic engagement, and activism? Must academics 'give back' once they collect data and publish results? In this volume, authors from a wide range of disciplines examine these relationships to assess how they can be fruitful or challenging. Describing the methodological and ethical issues that experts must consider when carrying out public scholarship, this book includes a checklist for critical factors of success in engagement and an examination of the role of digital social media in science communication.

Have you ever felt too progressive for conservatives, but too conservative for progressives? It's easy for faithful Christians to grow disillusioned with civic engagement or fall into tribal extremes. Representing the AND Campaign, the authors of this book lay out the biblical case for political engagement and help Christians navigate the complex world of politics with integrity.

'Lazere's [book] is heaven-sent and will provide a crucial link in the chain of understanding how conflicts are structured and, most importantly, how they can be rationally addressed - a healthy antidote to the scepticism that has become so pervasive in academic life.' Alan Hausman, Hunter College This innovative book addresses the need for college students to develop critical reading, writing, and thinking skills for self-defence in the contentious arena of American civic rhetoric. In a groundbreaking reconception of composition theory, it presents a comprehensive critical perspective on American public discourse and practical methods for its analysis. Exercises following the text sections and readings help students understand the ideological positions and rhetorical patterns that underlie opposing viewpoints in current controversies - such as the growing inequality of wealth in America and its impact on the finances of college students - as expressed in paired sets of readings from the political left and right. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.

Voting is an opportunity to promote, protect, and preserve godly government. Passing up this opportunity means allowing those who would degrade the name of Christ to have their way in our lives. The Bible is clear, "Everyone must submit himself to the governing authorities, for there is no authority except that which God has established" (Romans 13:1). Since the Bible commands that we are to submit to government, we must ask ourselves: to what type of government do we want to submit? God in Government compellingly answers this question and covers other related subjects - often from a historical perspective. The book's emphasis is on how and why the United States has gone from being a Christian nation to a culture of secular humanism. How events like the Industrial Revolution and the Great Depression continue to impact our worldview and the way we vote. The reader will discover the true differences between the political parties, and why groups like labor unions, school teachers, and the media tend to align themselves with a particular party. Among other topics, we examine the Christian roots of capitalism and the truth behind the "separation of church and state." The book covers social issues like legalized abortion, gay rights, and welfare programs; and gives solutions and suggestions as to what Christians can do to get our nation back on track. RAY HARKER is an ideological activist and founder of God in Government, a conservative grassroots movement for which this book is the manual. Both the organization and the book are designed to educate and assist Evangelical Christians in the areas of civic responsibility and political ideology. The outreach provides lectures and seminars for churches and other interested groups. To learn more, visit [www.godgov.org](http://www.godgov.org).

Developments in information technology and the internet are taking place at an almost bewildering pace. Such improvements, however, are believed to present opportunities for improving the responsiveness and accountability of political institutions and enhancing citizen participation. In *Cyberdemocracy* the theoretical arguments for and against "electronic democracy" and the potential of information and communication technology are closely examined. The book is underpinned by a series of case studies in the US and Europe that demonstrate the application of "electronic democracy" in a number of city and civic projects. *Cyberdemocracy* provides a balanced and considered evaluation of the potential for "electronic democracy" based on empirical research. It will be a valuable contribution to a vigorous debate about the state of democracy and the influence of information technology. Roza Tsagarousianou is a lecturer and researcher at the Centre for Communication and Information Studies of the University of Westminster. Damian Tambini is a research fellow at Humboldt University, Berlin. Cathy Bryan is a researcher at Informed Sources and is concerned with developments in media and communications technologies.

The rise of open data in the public sector has sparked innovation, driven efficiency, and fueled economic development. While still emerging, we are seeing evidence of the transformative potential of open data in shaping the future of our civic life, and the opportunity to use open data to reimagine the relationship between residents and government, especially at the local level. As we look ahead, what have we learned so far from open data in practice and how we can apply those lessons to realize a more promising future for America's cities and communities? Edited by Brett Goldstein, former Chief Data Officer for the City of Chicago, with Code for America, this book features essays from over twenty of the world's leading experts in a first-of-its-kind instructive anthology about how open data is changing the face of our public institutions. Contributors include: Michael Flowers, Chief Analytics Officer, New York City Beth Blauer, former director of Maryland StateStat Jonathan Feldman, CIO, City of Asheville Tim O'Reilly, founder & CEO, O'Reilly Media Eric Gordon, Director of Engagement Game Lab, Emerson College Beth Niblock, CIO, Louisville Metro Government Ryan & Mike Alfred, Co-Founders, Brightscope Emer Coleman, former director of the London Datastore Mark Headd, Chief Data Officer, City of Philadelphia "As an essential volume for anyone interested in the future of governance, urban policy, design, data-driven policymaking, journalism, or civic engagement, "Beyond Transparency" combines the inspirational glow and political grit of Profiles in Courage with the clarity of an engineer's calm explanation of how something technical actually works. Here are the detailed how-to stories of many members of the first generation of open government pioneers, written in a generous, accessible style; this compilation presents us with a great deal to admire, ample provocation, and wise guidance from a group of remarkable individuals." -Susan Crawford, author of *Captive Audience* "Just as he did during his time in my administration, Goldstein has brought together industry leaders to discuss issues of relevance in the open data movement and the practical implications of implementing these policies This book will help continue the work to make open government a reality across the country." - Mayor Rahm Emanuel, City of Chicago "A must-read for anyone who is passionate about what open data can do to transform city living." - Boris Johnson, Mayor of London

*Communicative Civic-ness* explores how political culture shapes social media interactions in civic participation, arguing that social media usage is informed by context-specific civil and political culture. Drawing on cutting-edge research, the book develops a new robust theoretical and conceptual framework on civic engagement and participation, comprising: contextual ethos of civic communication; political culture and civic communication; use of social media in private and public spheres; design of social media. It critically addresses issues within the concept of political culture and develops the concept of 'communicative civic-ness'. This concept seeks to aid a better-informed debate about the capacity of social media to support the pluralistic discussions that underpin deliberative democratic processes. This book appeals to both undergraduate and postgraduate students, as well as academics with an interest in areas including (but not limited to) sociology, political science and media studies. It will also provide useful information and understanding to third sector organisations and policy-makers regarding forms of civic participation.

Numerous studies have chronicled students lack of trust in large social institutions, declining interest in politics, and decreasing civic skills. This book is a comprehensive guide to developing high-quality civic engagement experiences for college students. The book defines civic engagement and explains why it is central to a college education. It describes the state of the art of education for civic engagement and provides guidelines for designing programs that encourage desired learning outcomes. In addition, the book guides leaders in organizing their institutions to create a campus-wide culture of civic engagement.

What does it mean to be an engaged American in today's divided political landscape, and how do we restore hope in our country? In a collection of "civic sermons" delivered at gatherings around the nation, popular advocate for active citizenship Eric Liu takes on these thorny questions and provides inspiration and solace in a time of anger, fear, and dismay over the state of the Union. Here are 19 stirring explorations of current and timeless topics about democracy, liberty, equal justice, and powerful citizenship. This book will energize you to get involved, in ways both large and small, to help rebuild a country that you're proud to call home. Become America will challenge you to rehumanize our politics and rekindle a spirit of love in civic life.

In *A Guide to the Civic Heraldry of England*, Ray Westlake has gathered together a comprehensive collection of seals and coats of arms in use by England's counties, cities and towns. The book will be a useful reference tool for those interested in heraldry, local and military history.

While people profess a disdain for politics, in a democracy politics is the primary vehicle for citizens to influence the decisions and decision makers that shape public policy at every level. This widely acclaimed work provides an overview of public policymaking in all its aspects along with basic information, tools, and examples that will equip citizens to participate more effectively in the policymaking process. It is intended for use in internships and service-learning programs, but will serve equally as a resource for any organized effort to involve citizens in community service and the exercise of civic responsibility. This updated edition includes an all-new case study on the issue of immigration, and all other case studies have been revised.

Cities are the places that have the greatest influence over life on Earth. The single biggest cause of global warming, the urbanisation of humanity, is potentially the principal solution. The 'ecological genius' of the city enables us to live better - while consuming, wasting and polluting less. However it remains a vast, largely hidden civic power. What is missing is a citizen's guide to turn the place where we live into the seat of the solution. Energising, motivating and uplifting, *Civic Revolution* is a topical and relevant book about the power of belonging that gets to the heart of how - and why - all of us must act. 'A timely and readable call to arms to people who want to make life better in their local community but also understand the need for more fundamental system change.' - Matthew Taylor, Chief Executive of the Royal Society of Arts.

Hope for American democracy in an era of deep divisions In *Healing the Heart of Democracy*, Parker J. Palmer quickens our instinct to seek the common good and gives us the tools to do it. This timely, courageous and practical work—intensely personal as well as political—is not about them, "those people" in Washington D.C., or in our state capitals, on whom we blame our political problems. It's about us, "We the People," and what we can do in everyday settings like families, neighborhoods, classrooms, congregations and workplaces to resist divide-and-conquer politics and restore a government "of the people, by the people, for the people." In the same compelling, inspiring prose that has made him an bestselling author, Palmer explores five "habits of the heart" that can help us restore democracy's foundations as we nurture them in ourselves and each other: An understanding that we are all in this together An appreciation of the value of "otherness" An ability to hold tension in life-giving ways A sense of personal voice and agency A capacity to create community *Healing the Heart of Democracy* is an eloquent and empowering call for "We the People" to reclaim our democracy. The online journal *Democracy & Education* called it "one of the most important books of the early 21st Century." And *Publishers Weekly*, in a Starred Review, said "This beautifully written book deserves a wide audience that will benefit from discussing it."
