Practical Guide to VIVA and OSCE in Ophthalmology Examinations is an essential study guide presented in a direct, exam-style question-and-answer format. It combines detailed explanations with high quality clinical photographs tailor-made to help readers ace specialist oral examinations (MMed, MRCS, FRCS, FRCOphth, FAMS, FRANZCO). Co-authored by ophthalmology trainees who took the final MMed and FRCOphth (Oral) in 2016 and 2017, this is a book written by trainees, for trainees, with prominent author contribution by Prof Wong Tien Yin. This book provides invaluable guidance to readers in presenting their answers in a logical, succinct and elegant manner. Practical Guide to VIVA and OSCE in Ophthalmology Examinations aims to complement the book titled The Ophthalmology Examinations Review by Prof Tien Yin Wong to guide candidates onto the path of success in examinations. This book illustrates the answering techniques employed during examinations, utilizing clinical photographs accompanied by a full template answer script of various high yield conditions. The style and format has been intentionally designed to simulate examination conditions and to provide candidates with ample practice in preparation for the examination. Most major ophthalmic degrees require trainees to take and pass an oral ophthalmic exam. This book fills a significant void in the market for ophthalmic training, where texts combining clinical photos and actual exam answering techniques are severely lacking. Readers will be able to follow the answering techniques and examples provided within the book so as to better cope with the clinical exams. Contents: Cataracts Cornea Glaucoma Vitreoretina and Uveitis Neuro-Ophthalmology Oculoplastics Pediatrics Refractive Miscellaneous Readership: University students and course facilitators. Keywords: VIVA; OSCE; Ophthalmology Examinations Review: Key Features: Provision of high quality and more complex clinical photos for discussion Detailed and to the point answering with full scripts provided relevant to the clinical photograph provided Prominent author contribution by Prof Wong Tien Yin

Essential Revision Notes for Intercollegiate MRCS

Fully revised and updated in light of the changes to the format of the MRCS examination, this second edition of Get Through MRCS: Anatomy provides candidates with the knowledge and practice necessary for excelling at the challenging MRCS part B OSCE examination. The updated new edition of the highly-praised Get Through MRCS: Anatomy Vivas Fully revised in accordance with the changes to be focussed on the OSCE format Detailed model answers and full explanations to ensure thorough understanding of how to get the best results Plentiful illustrations and high-quality photographs in full colour throughout Written by the experienced author of the highly successful first edition, Simon Overstall has extensive knowledge of the exam, both in teaching offline courses and authoring MRCS revision texts. Get Through MRCS: Anatomy is essential reading for MRCS candidates wanting to achieve

experts anatomical knowledge and to ultimately earn high results within their postgraduate examinations.

Surgical Critical Care

(Piano Solo Songbook). This creative collection arranged by "Backwards Piano Man" Jason Lyle Black features ten medleys of songs from timeless Disney films for piano solo. 35 songs are included in all from the movies Aladdin, Beauty and the Beast, Cinderella, Hercules, The Jungle Book, The Lion King, The Little Mermaid, Mary Poppins, Moana and Mulan. Includes arranger notes from Black.

MRCS Part B OSCEs

Anatomedia: General Anatomy - Principles and Applications integrates both regions and systems in a concise and easily understandable text. This is a practically orientated book that introduces general anatomy concepts to medical, nursing and allied health students. Containing essential information for immediate comprehension of anatomical concepts and principles, over 700 clear illustrations, diagrams and real pictures of dissections further assist clinical understanding.

The Thin Book of Naming Elephants

'Ambitious, humane and absorbing . . . this book could not be better.' Spectator 'A deeply satisfying chronicle of women's lives at a time when this nation was tested as never before. Introduces you to hundreds of wonderful women - a magnificent regiment - you wish you had met in the flesh, and when you close it you feel enlarged as well as amazed by their experiences. Women were fire watchers, ARP workers, first aiders, ambulance drivers, police officers, messengers, transport, demolition and repair workers. A rich, entwined narrative, which moves in and out of the lives of an absorbing cast of characters during ten years.' Daily Mail 'A magnificent work of social history written with passion and panache.' Daily Express 'Splendid. Using diaries, autobiographies, memoirs and interviews, Nicholson charts the work, the lives, the relationships and the emotions of typists, factory workers, housewives, debutantes and artists working as nurses, in the services, in intelligence, in factories, on the land and as codebreakers. A tremendous achievement.' Observer 'A deeply moving account of female courage both at home and overseas. The joy of Nicholson's book is the way she has plaited scores of individual stories into a richly textured account of the many forms that female courage can take.' Mail on Sunday

Clinical Cases and OSCEs in Surgery E-Book

MCQs for ENT: Specialist Revision Guide for the FRCS is a key resource for candidates preparing to sit the FRCS (ORL-HNS). It contains over 300 single best answer questions and over 70 extended matching questions to help candidates prepare for all aspects of ENT they may face in this challenging exam. Written by expert consultants who have succeeded in the exam, this resource provides comprehensive coverage of theory and practice, including new questions on challenging topics such as electroneurography and voice clinic procedures, and questions on rare topics such as oropharyngeal cancers. All answers have full explanations, providing candidates with high-quality self-assessment in order to maximize exam success. Providing a thorough assessment of the reader's ENT knowledge, this is an essential revision book for any candidate facing the FRCS ORL-HNS exam.

Pediatric Sleep Pearls E-Book

THE THIRTEENTH EDITION OF THE CLASSIC TEXTBOOK, FIRST PUBLISHED IN 1960 Written by one of the great teachers of anatomy, the thirteenth edition of Clinical Anatomy continues to provide thousands of medical students, postgraduate trainees and junior doctors across the world with essential anatomical information within a clinical setting. It is particularly appropriate for those preparing for the Intercollegiate Membership Examination of the Royal Colleges of Surgeons (I-MRCS). Professor Harold Ellis is again joined by Professor Vishy Mahadevan to provide detailed, easy-to-follow structured text suitable for anatomy students and trainees of all levels. Fully revised and updated with many new illustrations, this new edition features for the first time, several anatomical drawings overlaid on a living anatomy model to provide detailed topographical orientation and accurate surface representation. The companion website at www.ellisclinicalanatomy.co.uk/13editions contains digital flashcards of all the illustrations and photographs contained in the book - ideal for revision and teaching purposes.
Presented in a structured question-and-answer format, the second book in this comprehensive reference addresses the revised syllabus of the Membership of the Royal College Surgeons' (MRCS) Objective Structured Clinical Examination (OSCE). Beneficial to MRCS OSCE candidates as well as to surgeons, doctors, and medical practitioners, this didactic guide presents approved, structured clinical-examination protocols supplemented with a clinical-examination DVD. Chapters on communication skills, ethics, and history-taking skills are also included.

Practical Guide to Viva and OSCE in Ophthalmology Examinations

This new edition of the Care of the Critically Ill Surgical Patient (CCrISP) course manual has been fully updated and revised by a multidisciplinary team of surgeons and anaesthetists. It remains true to the original aims of the course: to encourage trainees to take responsibility for critically ill patients, to predict and prevent problems that patients might encounter while in hospital, to function well within the surgical team and communicate effectively with colleagues from other disciplines. CCrISP is a valuable adjunct to traditional ward training and continues to provide young surgeons with the structure and confidence they require to safely and effectively care for their patients on the ward and in theatre. Designed to develop skills that are necessary in the management of critically ill patients, CCrISP integrates knowledge, practical skills, communication and leadership.

Essential Radiological Anatomy for the MRCS

Gives candidates a means of practising some common questions that they will be asked in their viva examinations.

Surgical Talk

The new MRCS structure replaces the vivas and clinical style examinations with an OSCE-based system. This revision guide - the first in a series - fully reflects this new format and provides a structured, systems-based approach to revision. Key aspects of anatomy, physiology, critical care, surgical pathology and operative care are combined whilst focusing on the questions commonly asked in the exam. The material is presented in a practical, question-and-answer based format to help readers retain details whilst providing all of the essential information needed for examination success. MRCS Revision Guide: Trunk and Thorax is a concise, clear pocketbook that reduces the need for bulky textbooks by providing a quick reference guide for busy surgical trainees. If you are studying for the MRCS examination, you need this book.

Basic Science for the MRCS

Presented in a question-answer format, this is the most concise and accurate anatomy aid for the new Intercollegiate MRCS examination.

Disney Medleys for Piano Solo

A unique blend of integrated video and book content, How to Operate provides a comprehensive, multimedia training resource for medical students, junior doctors, MRCS candidates and surgeons in training. The three DVDs present over 40 of the most common general, urological, ENT and orthopaedic surgical procedures, complete with step-by-step commentary from experienced surgical consultants. At key points during each procedure, the frame freezes so that anatomical structures and pathology are ‘drawn’ onto the frame for clarity and to reinforce learning. The 10 hours of video is supported by an accompanying book containing an introduction to each procedure, a thorough explanation of the operation mirroring the video with relevant video stills, and bullet point summaries which can be used as OSCE-style checklists. With a foreword by John Black, President of the Royal College of Surgeons, How to Operate is a truly comprehensive learning resource for all budding surgeons. All you need to become a surgeon is here - scalpel not included!

SBAs and EMQs for the MRCS Part A: A Bailey & Love Revision Guide

Over recent years the MRCS viva examination has increasingly made use of radiological
Imaging to facilitate the discussion of anatomy relevant to surgical practice. It is rare for junior doctors to receive adequate exposure to radiology in their day-to-day surgical practice, which makes preparation for this part of the examination difficult. For many, examinations are stressful. The last thing a candidate needs is to be faced with unfamiliar radiological images. This review of surgically relevant radiological imaging aims to prevent initial uncertainties and will allow candidates to discuss relevant anatomy and score valuable points. An invaluable addition to any revision plan, this title also: • highlights typical anatomy viva questions • familiarizes candidates with a range of images of differing modalities (plain film, fluoroscopy, computed tomography and magnetic resonance imaging) • introduces different planes of imaging, enabling candidates to deal with unusual coronal or sagittal views with confidence • gives concise but detailed notes for quick consultation

Applied Surgical Anatomy for MRCS OSCE

This is the only revision resource devoted to anatomy at MRCS level with over 200 questions grouped by anatomical region, each with five true/false parts. Anatomy Questions for the MRCS comes in a portable, user-friendly paperback format with answer sections clearly marked to help determine weak areas of knowledge and reinforce learning. Written by authors with first-hand experience of the current MRCS examination format and with experienced senior advisor, this highly original text is a must-have for all MRCS candidates and a useful tool for medical students preparing for surgical examinations.

Care of the Critically Ill Surgical Patient, 3rd Edition

SBAs and EMQs for the MRCS Part A is an invaluable guide to sitting and passing the examination, which tests the candidates in their knowledge of the basic sciences as applied to surgical practice. Based on the highly successful Insider Medical MRCS Examination Clinical Course, this book facilitates the pathway for a novice clinician to pass this challenging examination. College-approved, systematic and coherent questions for all the main systems are included, providing comprehensive coverage of the surgical curriculum. Answers are provided in brief at the foot of each question page for rapid reference, while full explanations of each appear in a separate section at the end of each chapter. The sections provide insider tips on how to pass the examination and identify mistakes commonly made by many candidates, whilst providing references to the key chapters within Bailey & Love's Short Practice of Surgery. With over 350 SBAs and 50 EMQs, this book will provide helpful pointers for further study throughout training, and is essential reading for those preparing to sit Part A of the MRCS examination.

MRCS Revision Guide: Trunk and Thorax

This new edition has been thoroughly updated for today's undergraduate, offering: 65 presentations in an A-Z format; symptoms-based chapters; practice scenarios with answers; extensive information on the structural basis of History Taking; suggested prompt questions for core presentations; case scenarios; a section on asking difficult questions.

Surgical Critical Care Vivas

MRCS A Essential Revision Notes

This textbook is an introduction and guide to undergraduate surgery. It has been a bestseller since its first edition in 2001. The philosophy of this book is to focus on the level of knowledge and the approach that would be expected of the better students reaching the end of their undergraduate training. Avoiding a book that is too cumbersome, we have tried to make this volume readable and enjoyable, using various techniques to help the reader remember key facts: the text has been deliberately written in a tutorial-like story format as opposed to a set of lists, since this makes it easier to understand and remember. In addition to general surgery, the book contains sections on trauma, orthopaedics, urology and ENT, making it the only comprehensive textbook for medical students wishing to learn top tips in surgery. Subjects that are poorly covered in other main texts — such as fluid balance management and minor surgical procedures — are dealt with in a tutorial fashion in this book, and there is a section on how to problem-solve even in the context of areas unknown to the student. This book is useful for medical students and also for junior doctors during their day-to-day working lives, as well as those coming up to postgraduate exams. Each chapter is written by an authoritative author, alongside the book editors, and

They have ensured it remains in the spirit of the bestselling previous editions. Foreword

Foreword (31 KB)

DrExam Part B MRCS OSCE Revision Guide Book 2

- Most preferred book of surgery for PG aspirants in 2019 - Only book on surgery for PGMEE written by leading faculty and super specialty surgeon - First book to cover sample video questions on Surgery seeing the changing trends of examinations - The complete content has been updated from the latest Editions of Bailey and Love 27/e, Sabiston's 20/e, Schwartz 10/e, Campbell-Walsh Urology 11/e, Harrison's 20/e, Blumgart's 6/e, Shackelford's 8/e and Devita 11/e - Latest updates of AJCC Cancer staging 8th Edition & ATLS 10th Edition included - All chapters are reviewed and inputs are given by the concerned super specialty consultants - Every chapter starts with One Liners which will help you learn the basic points related to the respective chapter - Several important points like - Extra-Mile, Recent Advances, Must Know, Controversy Desk and High Yield Facts are added to pay special attention while you read the text - Highest number of illustrations are given to supplement the text for better understanding of intricate concepts - Author's Facebook Help Group Page “Surgery Sixer” to clarify all doubts of the readers.

Get Through MRCS: Anatomy 2E

MRCS PART B OSCE: ANATOMY is unique in focussing solely on providing the knowledge necessary to pass one of the toughest exam components facing surgical trainees. Offering the most up-to-date coverage of anatomy practice questions and presented in a clear layout, chapters are mapped to the syllabus to deliver structured revision in all the key topics. Featuring a wealth of questions and fully descriptive answers, this book provides the essential revision text to maximise chances of exam success. 150 scenario-based anatomy questions, model answers and enhanced with concise revision notes Highly illustrated with diagrams and tables to improve understanding of complicated anatomy Includes practical advice on how to approach the exam and useful tips to achieve the highest marks Familiarizes candidates with the full range of presentation: surface anatomy, prosections and radiological imaging Edited by highly experienced anatomist, Professor Vishy Mahadevan Highly Commended at the BMA Medical Book Awards 2013

Anatomy Vivas for the Intercollegiate MRCS

An A-Z guide covering the essentials of pathology for examination candidates.

DrExam Part B MRCS OSCE Revision Guide Book 1

Following in the steps of the bestselling Sleep Medicine Pearls, this practical resource provides authoritative guidance on the evaluation and management of common pediatric sleep medicine problems using concise clinical vignettes. Experts in this rapidly growing field, led by Drs. Lourdes M. Del Rosso, Richard B. Berry, Suzanne E. Beck, Mary H. Wagner, and Carole L. Marcus, provide a hands-on, case-based approach, perfect for physicians studying for the sleep boards, fellows learning sleep medicine, and physicians who see children in their practice. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Over 95 cases review key elements in the evaluation and management of a wide variety of pediatric sleep disorders. An easy-to-read "pearls" format summarizes 2 to 5 major teaching points for maximum retention. Short, templated chapters are ideal for use by busy physicians. Current scoring criteria from the American Academy of Sleep Medicine manual for sleep and associated events version 2.2, as well as the current International Classification of Sleep Disorders, 3rd Edition (ICSD-3). Expert coverage of normal sleep in children, as well as sleep disorders associated with common medical, neurologic, psychiatric, neurodevelopmental, and genetic conditions. Up-to-date information on pediatric obstructive sleep apnea syndrome diagnosis and management. Numerous illustrations of polysomnographic fragments and pictures of clinical findings help you quickly recognize key pediatric sleep patterns that lead to an accurate diagnosis. All illustrations online are in full color. An ideal resource for pediatric sleep medicine specialists, adult sleep medicine specialists, pediatric pulmonologists, pediatric neurologists, pediatric otolaryngologists, general pediatricians, and pediatric psychologists.

SURGERY SIXER FOR NBE

This book is derived from Ronald McRae's Pocketbook of Orthopaedics and Fractures, a highly
Access Free Drexam Part B Mrcs Osce Revision Guide Clinical Examination Communication Skills And History Taking Bk 2

Successful 'survival guide' for the trainee working in accident and emergency or orthopaedic departments. Retaining the underlying principles of the original editions this comprehensive rewrite and re-presentation provides complete coverage of orthopaedic trauma surgery as relevant to contemporary practice. McRae's Orthopaedic Trauma and Emergency Fracture Management utilizes a detailed descriptive and didactic style, alongside a wealth of illustrations all completely redrawn for this book. The first section on general principles in orthopaedic trauma deals with basic terminology and classification, principles of closed and operative management of fractures, infection and complications. The main section provides a regional review of specific injuries, each following a logical sequence describing emergency department and orthopaedic management, and outlining a safe and widely accepted management strategy. Each chapter begins with an overview of the relevant anatomy and principles of the examination of the patient. The book provides a comprehensive overview of both surgical as well as conservative management of orthopaedic trauma injuries. This book is a fully rewritten text based on a classic textbook by Mr Ronald McRae. Now in a larger page size the book contains over 500 illustrations all drawn in two colours for this new edition. Over 250 x-rays accompany the text, many of which are connected with the line drawings to ease interpretation.

FRCoPhth Part 1: 400 SBAs and CRQs

Offers an introduction covering the MRCS exam with particular reference to OSCEs; an overview of clinical skills in history taking and physical examination; chapters covering sections of the exam with popular cases in the OSCE format at the end of each chapter; and, a layout with colour images.

MRCS Part A: 500 SBAs and EMQs

Presented in a structured question-and-answer format, the second book in this comprehensive reference addresses the revised syllabus of the Membership of the Royal College Surgeons' (MRCS) Objective Structured Clinical Examination (OSCE). Beneficial to MRCS OSCE candidates as well as to surgeons, doctors, and medical practitioners, this didactic guide presents approved, structured clinical-examination protocols supplemented with a clinical-examination DVD. Chapters on communication skills, ethics, and history-taking skills are also included.

McRae's Orthopaedic Trauma and Emergency Fracture Management

FRCoPhth Part 1: 400 SBAs and CRQs offers a wealth of practice questions for candidates preparing to sit the FRCoPhth Part 1 exam. With so few revision resources available, this book will be an invaluable tool for candidates requiring comprehensive practice material for successful exam preparation. Organised into 3 complete exam papers, all the questions feature corresponding answers that reinforce key concepts and enable candidates to gain a thorough understanding of the subject. Topics in exam papers 1 and 2 are arranged in line with the FRCoPhth syllabus, while exam paper 3 is presented as an unstructured mock exam to replicate the experience of sitting the exam. Covering the full breadth of the syllabus, FRCoPhth Part 1 400 SBAs and CRQs provides the definitive revision guide to maximise chances of exam success. 360 SBAs and 40 CRQs (Constructed Response Questions) arranged as three exam papers, providing a large number of questions for exam revision Chapters 1 and 2 are exam papers, structured according to the FRCoPhth syllabus to allow organised, progressive revision Chapter 3 is structured as a standard mock exam allowing candidates to practice under exam conditions Answers feature detailed explanations to consolidate knowledge

Sultry Days

Provides the most up-to-date material, matching the MRCS syllabus, to aid preparation for the MRCS A examinations. The book covers every major subject in the MRCS syllabus; works systematically through every general surgical topic likely to appear in the exam; highlights important principles of Surgery; contains important lists and vital points; is clearly laid out with illustrations to aid understanding.

How to Operate

This book allows candidates to practise some of the most common questions that they will be asked in their viva examinations, with detailed model answers and diagrams to highlight key points where necessary. Pocket-sized for portability, and neatly packed with useful
Access Free Drexam Part B Mrcs Osce Revision Guide Clinical Examination Communication Skills And History Taking Bk 2

Millions Like Us

This book is a concise revision guide to the core basic sciences - anatomy, physiology and pathology - which comprise the essential knowledge required by the trainee entering the specialty of surgery. It has been written in a style to facilitate easy learning of the essential facts, with indications of both their clinical relevance and importance. This book concentrates on those topics which tend to be recurring examination themes for initial surgical training. It will be an invaluable resource for the basic surgical trainee studying for the Intercollegiate MRCS examination, as well as proving useful for those in higher surgical training and for the surgically inclined, well-motivated student. The book covers in one volume all the essentials of the basic sciences – anatomy, physiology and pathology – to aid the candidate for the MRCS examination. In covering the applied basic science the books explains the application and clinical relevance of the three sciences. The text is written in an appropriate 'bullet-point' style to allow easy reading and rapid exam preparation. The contents concentrate on the recurring common themes of the examination, thus helping direct appropriate learning and focussing on the specific important areas of knowledge. The book is illustrated with line drawings which are clearly annotated to aid learning. In this Second Edition, chapters have been updated and sections expanded to cover topics which are particularly relevant to examinations. The microbiology chapter has been rewritten, and the section on skin healing has also been extensively rewritten to include a section on burns, skin grafting and the anatomy of flaps. Each chapter has new OSCE scenario questions added to bring together the basic science and its clinical application in OSCE examinations.

MCQs for ENT

Presented in a structured question-and-answer format, the first book of this comprehensive reference addresses the revised syllabus of the Membership of the Royal College Surgeons' (MRCS) Objective Structured Clinical Examination (OSCE). Beneficial to MRCS OSCE candidates as well as to surgeons, doctors, and medical practitioners, this didactic guide covers the important aspects of surgical radiology, applied surgical science, critical care, anatomy, surgical pathology, operative surgery, surgical skills, principles of surgery, and patient safety. Chapters on communication skills, ethics, and history-taking skills are also included.

Surgical Pathology Revision

Featuring a wealth of practice questions, MRCS Part A: 500 SBAs and EMQs allows trainees to test themselves on everything they need to know to pass the MRCS Part A exam.

History Taking in Medicine and Surgery

Nisha falls in love with God in the college canteen when she is an impressionable teenager and he a ragged, streetwise student. God’s driving ambition leads him into journalism while Nisha lands a job in advertising. Sycophants, whores, fixers, pretty boys and party girls drift in and out of their lives as their careers take off with dizzying speed and then, as abruptly, everything goes terribly wrong . . .

Anatomy Questions for the MRCS

This book of over 140 cases is designed for candidates preparing for all surgical examinations, whether at undergraduate, postgraduate or exit examination level. It will demystify and simplify the clinical assessment of surgical cases and provides invaluable advice on how to achieve success. The text includes top tips, acronyms and up-to-date summaries of current practice based on the authors’ personal experience of surgical examinations. Cases are graded in terms of likely appearance in the examinations. Top tips emphasize specific subjects which cause confusion. The text provides advice on the most appropriate time to finish an examination. Examples of the common procedures and props that come up in the skill-based examination format are included. This fully revised Second Edition is now in colour and includes photographs of key manoeuvres performed during specific surgical examination routines. Includes a new section on communication skills. A new co-author in academic surgery joins the project.

Applied Surgical Physiology Vivas
Publisher Provided Annotation  There's an elephant in the room that everyone knows about but no one is acknowledging. The elephant is implicit and undiscussable and lurks in every organization. Everyone talks around the elephant and thinks that everyone else knows about the elephant. However, until the elephant's presence is made explicit, the level of dialogue and therefore the quality of decision-making is limited. Sound familiar? Using NASA's tragic accidents and Enron's bankruptcy as examples of the price of not having open, constructive dialogue, The Thin Book of Naming Elephants shows how great companies create an environment that encourages and listens to input from all levels of the organization.

Sources in the History of the Modern Middle East

This is the only guide trainee surgeons will need to help them pass the MRCS Part B OSCE exam. It includes comprehensive revision notes on all the areas covered in the exam, practice scenarios and model answers laid out as in the exam, and essential exam techniques.

General Anatomy

Suitable for candidates preparing for the intercollegiate MRCS exam, this title presents the essential facts in each subject area in note form with special attention given to areas that are often poorly understood.

How to Pass the MRCS OSCE

This fully updated landmark revision guide is a must-have for all surgical trainees working towards the MRCS Part B OSCE.

Clinical Anatomy

This is the 12th edition of the market-leading Business Finance, a highly regarded text that has now been around for over 40 years. It takes a rigorous and authoritative coverage of major corporate finance topics, sitting at the highest level with regard to technical concepts. It takes a strong analytical approach and is well-suited to strong finance units where students will be continuing on to further studies in corporate finance. The Peirson brand is iconic in this market, with its respected author team including three Professors of Finance. The authors' objective for this update is to ensure that new developments in the field are incorporated whilst retaining the theoretical rigour for which the text is known. The text is suited to rigorous second-year subjects and lower third year subjects, as well as MBA-level finance nonmajors.

Business Finance

This unique primary source reader provides first-hand accounts of the events described in Middle Eastern history survey texts. The text is organized into ten chapters featuring chapter introductions and headnotes. The primary source documents cover the late 18th century through the beginning of the 21st, exploring political, social, economic, and cultural history and infusing the volume with the voices of real people. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
